Hello Devs!

This is a reminder that the **Llama 3.3 70B Versatile** model will be decommissioned on **August 16, 2026**. After the decommission date, requests to the model will no longer be served.

We encourage you to transition your workloads to our recommended replacement model, **GPT OSS 120B / Qwen3.6 27B**, as soon as possible.

Additionally, you can view all models available on GroqCloud [[here](#)].

NEXT STEPS

Migration Support: Our team is ready to assist you with the transition process. Please reach out if you need guidance on how to migrate your workloads effectively.

Documentation: Detailed guides and resources are available in our developer portal.

We appreciate your understanding and support as we move forward with these enhancements. If you have any questions, feel free to reach out to us at support@groq.com or reply to this email.

Thanks for building with us,

The Groq Team

About Groq

The low-cost, high performance inference platform, powered by the Groq LPU.

Groq delivers instant access to leading openly available AI models with **GroqCloud™**.
